The information shall be submitted at the wire center level or census block as appropriate.

1.1 Progress Report

1.2 Universal Service Support Received and How It Was Used

Response to 1.1:

Wiggins Telephone Association has been designated an ETC by the Colorado Public Utilities Commission, and that Commission has heretofore not required ETCs to file service quality improvement plans or annual updates. Hence, in accordance with the Wireline Competition Bureau's Clarification Order in DA 12-147, issued on February 3rd, 2012, paragraph 7, this provision's requirement to submit a progress report does not apply to Wiggins Telephone Association for this filing period.

Response to 1.2:

Wiggins Telephone Association received a total of \$2,348,113 in federal high cost support during 2011. Over that same time period, the company made regulated investments of approximately \$3,257,224 and incurred regulated expenses of approximately \$2,970,909 to provide telecommunications service to the residents and businesses of its serving territory. The Company has used its federal high cost support to provision telecommunications services to all requesting consumers throughout the entirety of its certificated service area at rates that while comparable with those in urban areas, are significantly lower than the cost of providing service.

In part, through federal high-cost support, Wiggins Telephone Association has invested in a modern telecommunications network utilizing fiber optic cable and advanced circuit-switched and IP technology throughout its service territory resulting in a vast improvement in the quality of the service area's communications infrastructure.

Report 2: §54.313 (a) (2)- Outage Report

- 2.** Detailed information on any outage in the prior calendar year, as that term is defined in 47 CFR 4.5, of at least 30 minutes in duration for each service area in which an eligible telecommunications carrier is designated for any facilities it owns, operates, leases, or otherwise utilizes that potentially affect

(i) At least ten percent of the end users served in a designated service area; or

(ii) A 911 special facility, as defined in 47 CFR 4.5(e).

(iii) Specifically, the eligible telecommunications carrier's annual report must include information detailing:

(A) The date and time of onset of the outage;

(B) A brief description of the outage and its resolution;

(C) The particular services affected;

(D) The geographic areas affected by the outage;

(E) Steps taken to prevent a similar situation in the future; and

(F) The number of customers affected.

Response:

Wiggins Telephone Association did experience one outage during 2011 that meet the criteria listed above. A copy of the Colorado report is attached.
